

永不孤獨 (上)

沒有人喜歡孤獨，但是孤獨卻喜歡找上人。既然避不開也免不了，那我們就得去認識孤獨，然後才能避免孤獨或是超越孤獨。在始祖亞當、夏娃犯罪之後，使人產生孤獨的感覺，是因為罪入了世界，人類離開了神，從而與原本親密的一切，都有了隔離感。

很多時候，一個人會感到孤獨是自找的。在自我的想像中，認為這個世界只剩下自己還在堅持所謂的「正義」。在文人的胸懷中，也常透著——我是那個永遠的清流的孤獨感，以致曲高和寡，無人是志同道合的朋友。在這種思維之下，眼中常常只看見自己，而忽略了他人，自然會產生不必要的孤獨感，有如以利亞一般。

孤獨，也可能來自於人與人的差異性。從小信主的人與獨自領受信仰的人，在一開始的相處當中，總會有一些格格不入、進而導致孤獨感。唯有藉著十字架的道理，才能消除一切的隔離、孤獨感；因著與神的連結進而與人和好，方能體會主內一家的屬靈之情。

by numerous human activities. Based on these factors, the International Union for Conservation of Nature (IUCN) has designated the site as critical habitat for the black-footed catfish in August last year.

The main threats to the reduction of freshwater fish in estuarine and coastal habitats are water pollution, habitat loss through land reclamation, and increased fishing pressure. The main threats are directly related to development projects along the coast and upstream of the west coast, while the last is related to the severe economic pressures brought upon fishermen by the downturn of their fishing grounds and a general decrease in production.

DEAR DR GOODALL,

Welcome back to Taiwan the *Itha Formosa* as the Portuguese called it in the 16th century as they passed what is now the site of our seventh and eighth nuclear power generators along the north and northeast coast.

I am sure that you must be aware of Taiwan's magnificent biodiversity and perhaps you also know that about 30 of the roughly 80 cetacean species in the world swim or used to swim

human in western Taiwan and all those who eat food produced in western Taiwan. It is highly likely that some of the food you will be served during your stay was produced in the many contaminated fields and waters of western Taiwan.

Indeed, two of the world's only power plants within the boundaries of a national park are located in western Taiwan. Research shows
